## State High Schools

### Will See Art Work.

The department of art of the University of Missouri wants the high school students, grade pupils and the townspeople in Missouri to see some of its paintings, drawings, and design work.

An exhibit is being prepared to be loaned to the high schools and everything possible will be done to allow as many towns as possible to have the display. The only expense will be the transportation from one school to another. The maximum cost will not be over \$2. The collection will remain in each high school building about ten days.

The department of art believes that the exhibit will be of considerable benefit to the students of the various high schools and that it will be appreciated by the grade pupils and townspeople.

The exhibit is being handled by the Extension Division of the University.

### Missouri a Lumber State.

Jefferson City, Feb. 13.—While Missouri is not generally considered much of a lumber producing state, yet in the year 1914 it ranked first in quantity and value of sycamore lumber; fourth for cottonwood lumber and fifth for walnut and elm lumber, according to a bulletin of the bureau

of labor statistics issued today. Information gathered last year from 1,210 saw mills which were in operation indicated that the lumber output of Missouri for the last fiscal year was 422,470,000 feet, which, at an average price of \$18.25, was worth \$7,710,078. A few years ago Missouri held higher rank and produced more lumber than it does now. This was before the vast fertile areas of Dunklin, Pemiscot and New Madrid counties had been turned into cotton plantations, then being covered with heavy growths of cottonwood, sycamore, cypress, elm, oak and other of the species which prevail in Missouri.

### Business Partners 25 Years.

B. F. Moore of Kansas City, who has been visiting his partner in the lumber business, Geo. E. Logan, has returned home. Mr. Moore and Mr. Logan organized the Logan-Moore Lumber Co. 25 years ago the 20th of January, and in this visit they not only reviewed the work of the last year but that of a quarter of a century. The business relation of these gentlemen during this time has not only been profitable but has been most pleasant also. The Logan-Moore Lumber Co. has yards at many points and they have built up a big business that is widely known.—Nevada Mail.

# SUDAN GRASS

Sudan Grass is an annual grass and grows from seven to nine feet. The stems are small and foliage heavier than Johnson Grass, though entirely distinct from Johnson Grass as it does not have the under ground root stock and requires reseeding every year, it dies when frost comes, the same as sorghum, of which it is a species.

- 1.—It is a drought resister, no climate too dry or too wet.
- 2.—It is an annual grass.
- 3.—It produces 3 to 10 tons per acre.
- 4.—It produces 300 to 1000 pounds seed per acre.
- 5.—It grows well on any kind of land.
- 6.—All kinds of stock eat it readily.
- 7.—This grass will revolutionize the hay and stock proposition in the United States.
- 8.—Seed required per acre to plant in rows three feet apart, 2 lbs.
- 9.—Seed supply limited and will likely be very high, before the end of the season. Book your orders now and save money.
- 10.—I am booking orders for immediate or future shipment at \$1 per pound cash with order, or if preferred will ship by parcel post mail C. O. D.

**W. M. CASSITY, Butler, Mo.**

## Apportionment of Railroad, Telephone and Telegraph School Money for the Year 1914.

### MINGO TOWNSHIP

Dist.	Pupils	Rate	Am't
1	25	\$ 1.20	\$ 30.00
